1. Login 3
2. Generating dynamic password 4
3. Homepage – menu order and widgets 6
1. Login

Go to https://portal.citidirect.com in a web browser. You may also use:
- CitiDirect BE Mobile: https://m.citidirect.com - details HERE.
- CitiDirect BE Tablet - details HERE.

For requirements for proper CitiDirect BE system operation, including a list of web browsers, please click here: http://www.citidirect.pl.

Upon entering the website for the first time, or if web browser history was deleted, country selection will appear.

Expand the list and select your country, next click “Go” (when you choose location “Poland” the system login site will automatically display in Polish).

In the field Login Method choose: “Challenge Response”.

The field Login ID will display.

Enter the Username (alias) that you received in an e-mail from the Bank at the time of authorization and click Continue.

Challenge and Response fields will display.

You will find an eight-digit code in the Challenge field.

The method of dynamic password generation that needs to be entered in the Response field is described above.

After re-entering the password, click Login.
2. Generating dynamic password

At login, CitiDirect BE users make use of individual SafeWord card (token) or MobilePASS application, installed on a mobile device.

- Generating a password – SafeWord card

Click ON in order to insert SafeWord card.

“ENTR PIN” will be displayed. Enter your PIN.

Upon entering the last PIN digit, “HOST?” will be displayed.

Enter the number 9. “CHALLNG?” will be displayed.

Copy the digits from the Challenge field. Upon entering the last digit the card will automatically generate a dynamic password. Enter the password in the Response field and click Login.

NOTE: Passwords generated by the SafeWord card consist of digits from 0 to 9 and letters A, H, C, P, E, F. In case of any doubt whether to type a digit or a letter (e.g. zero 0, or letter O), always type a digit.

- Generating a password – MobilePASS application

Run the application by clicking MobilePASS icon.

At the Token PIN prompt. Enter your PIN.
The display shows the words **Challenge Code**. Copy the digits from the **Challenge** field.

Upon entering the last digit, the application will automatically generate a dynamic password. Enter the password in the **Response** field and click **Login**.
3. Homepage – menu order and widgets

A simple home page for login allows users to benefit from basic system functionalities without the need to run more advanced options. Users can see a menu reflecting their authorizations in the system.

Home page design customization through a wide array of widgets, (convenient features and shortcuts offering access to system information and functions) allows users to make use of selected options, such as:
- Easy execution of most important tasks from the home page
- Configuration of homepage shortcuts enabling quick transfer to a selected functionality in the system
- Access to a wide array of Bank products without the need for additional login (Single Sign-On).

Basic system modules available depending on authorizations held in the CitiDirect BE system:
- Payments – creating and authorizing orders, templates
- Trade/eForms – dealing with transaction services and submission of electronic applications
- Reports & Analytics – advanced reporting module
- Inquiries & Searches – quick access to operation history
- File Services – import/export of files
- Self Service – system administration
- More Citi Products – other services are available without the need for additional login

Important messages for system users.

My settings – the possibility of personalization of global system settings (e.g. date format used) and modification of contact details.

Here you can add convenient widgets to be displayed on your homepage. These significantly improve functionality.

Sample widgets, which are convenient shortcuts in the CitiDirect BE portal, may be added individually in the section Customize Homepage in the top right corner of the screen.
How to add / delete widgets?

In order to select helpful widgets on the home page, go to the Customize Homepage tab then click Add or Remove:

You can determine how widgets are displayed (e.g. list, tiles) on the CitiDirect BE portal web page in the design project option. To do this, choose your preferred arrangement.

Additionally, selected widgets can be personalized by choosing the key “Customize” - gear wheel symbol - for example in the widget Initiate payments.

NOTE: Once you log in to CitiDirect BE Portal, the recently entered user settings for homepage design are remembered by the system. Widget contents are automatically refreshed only at login. If the information presented in the widget is incorrect, please select Refresh.

How to log in to another company within a group of companies using the same token?

CitiDirect BE allows a configuration of authorizations so that it is possible to log in to other entities within one business name cluster with one token. In the case of giving users access to new functionalities of linking, the option Linked Client is displayed after login. After indicating a business name, click Go. The scope of available options in open profile settings will depend on individual user authorizations in the system.
