II. ASSESSMENT OF FINANCIAL RESULTS AND GENERAL SITUATION OF THE COMPANY

(i) The growth rate in the economy was relatively stable during 2014, reaching its peak in the second quarter, followed by a slowdown, with the average of 3.3 percent for the year. In turn the consumer price index did not change year over year, mainly as a result of falling fuel and food prices. Taking into account both deep decline in the inflation rate and deteriorating growth outlooks, the Monetary Policy Council (MPC) decided to cut the reference interest rate by 50 basis points and the lombard rate by 100 basis points in the second half of 2014.

In such a demanding market environment the Bank earned a net profit of PLN 971 million, i.e. 4% higher versus prior year. The high efficiency of the Bank and its safe and stable capital position are the main areas where the Bank surpassed its competitors.

(iii) The key factors affecting the financial result in 2014 include a decline in net interest income, offset by consistent cost discipline and positive net impairment charges for financial assets, achieved thanks to the continued stabilization of the credit portfolio of the Bank.

(iv) In 2014, operating revenues amounted to PLN 2.408 billion and were PLN 58 million, or 2.4%, lower versus the 2013 level, first of all as a result of a decline in net interest income and a lower result on investment debt securities. On the other hand, the result on trading financial instruments rose by PLN 35 million, i.e. 10.1%, in consequence of higher earnings from interbank operations.

(v) In 2014, as in 2013, the Bank strived to maintain cost discipline. As compared to 2013, costs declined by PLN 82 million, or 6.2%, mainly because of restructuring savings, which were partially reinvested in branch conversion efforts (including the Smart Banking Ecosystem project), technologies and marketing.
(vi) The year 2014 also saw a further stabilization of quality of the credit portfolio, which was confirmed by positive net impairment charges for financial assets, amounting to PLN 18.3 million. In addition, the Bank sold some impaired cash loan and credit card exposures with related impairment charges totaling PLN 161.6 million. As a result, the Non-Performing Loan (NPL) ratio was reduced to the record-low level of 4.5% as of the end of 2014.

(vii) The Supervisory Board concludes with great satisfaction that it was another year of sustainable growth of lending, both in institutional and consumer banking area, this time by 9% and 11%, respectively, versus prior year. On the side of deposit volumes, funds on the current accounts of clients with the Bank continued to expand thanks to a strategic focus on operating accounts. As a result, the deposit base of the Bank rose 13.5% year on year.

(viii) As of the end of 2014, shareholders’ equity was practically unchanged versus prior year level. The Supervisory Board believes that the level of capital maintained by the Bank is sufficient to ensure the financial safety of both our institution and deposits in our custody, as well as to support various development scenarios for the Bank. As of the end of December 2014, the Capital Adequacy Ratio (CAR) of the Bank was 17.2% and, as always, one of the highest ratios among the large banks operating in Poland’s market. The high CAR level achieved by the Bank confirms its financial safety and solid capital base.

(ix) The Supervisory Board assesses cooperation of the Bank with its majority shareholder on an ongoing basis. That cooperation is multidimensional, with the key areas including implementatons of new banking products and IT systems, risk management, financial controlling, HR management and internal control. The Supervisory Board acknowledges the efforts of the Management Board in the area of adequate settlements of services provided by the majority shareholder.

(x) Because of the risk of zloty appreciation in connection with monetary policy easing in the Eurozone and the risk of increasing geopolitical uncertainty in Eastern Europe, which may hamper the growth rate in Poland, the Supervisory Board assumes that its close cooperation with the Management Board should be continued to examine the impact of those risk factors on the situation of the Bank.

(xi) Taking into consideration the financial results achieved, the safe position of the Bank, the stable capital and liquidity ratios and the consistent and coherent strategy of the Bank, the Supervisory Board's assessment of the activities of the Bank in 2014 is positive. Simultaneously, the Supervisory Board is convinced that both already started and planned initiatives will contribute to an increase in shareholder value by allowing Citi Handlowy to achieve optimal financial results and market position in a challenging market environment.
III. ASSESSMENT OF THE INTERNAL CONTROL SYSTEM AND RISK MANAGEMENT SYSTEM THAT COVERS RISKS SIGNIFICANT TO THE BANK

(i) In accordance with its Articles of Association, the Bank has in place an internal control system that monitors if the Bank’s activities are lawful and correct and if its financial statements and disclosures are accurate.

(ii) The primary objective of the internal control system is to support decision-making processes that are to ensure the effectiveness and efficiency of the Bank’s operations, the reliability of its financial reporting and the compliance of the Bank’s activities with applicable laws and internal regulations. The internal control system includes risk control mechanisms, reviews of the Bank’s compliance with laws & internal regulations and internal audit.

(iii) The institutional internal control in the Bank is carried out by the Audit Department, being an independent organizational unit, operating within the organizational structure of the Bank. The Audit Department reports to the President of the Management Board. The tasks of the Internal Audit Department include independent and objective audits and assessments of adequacy and effectiveness of its internal control system and providing opinions on the management system of the Bank, including the effectiveness of management of all risks connected with the Bank’s operations.

(iv) Functional internal control is a duty of each employee of the Bank and, additionally, of his or her direct manager and associates, and of managers of organizational units of the Bank in the scope of quality, correctness and execution by individual employees of their tasks in order to ensure the compliance of such activities with procedures and controls of the Bank.

(v) The Internal Audit Department is overseen by the Supervisory Board of the Bank. The Internal Audit Department submits, on a regular basis, but at least annually, to the Supervisory Board and Management Board, its reports on any identified irregularities and deficiencies, as well as recommendations formulated after internal audits, and activities initiated to rectify such irregularities and to implement such recommendations. The head of the Internal Audit Department is invited to participate in all meetings of the Management Board and Supervisory Board.

(vi) The Supervisory Board has established a permanent Audit Committee. Its powers and duties include: oversight over financial reporting, risk management and internal & external audits. The Committee submits annual reports on its activities to the Supervisory Board.

The Supervisory Board positively assesses the functioning of the internal control system at the Bank.

(vii) The Supervisory Board has established a permanent Risk and Capital Committee. The Committee has been entrusted with tasks in the scope of oversight over the risk management system used by the Bank and of assessment of its effectiveness. The Committee submits annual reports on its activities to the Supervisory Board. The powers of the Committee in the scope of supervision over the risk management system include, without limitation, verifications of compliance of the Bank’s policy in the scope of assumed risks with the strategy and financial plan of the Bank, verifications and recommendations to the Supervisory Board in respect of the general risk level of the Bank, and reviews of periodic reports on the types and amounts of risks connected with the Bank’s activities.

The Supervisory Board positively assesses the functioning of the system used by the Bank to manage significant risks.
IV. ASSESSMENT OF ACTIVITIES OF THE SUPERVISORY BOARD

(i) Corporate governance

In the reporting year, the Board adhered to the corporate governance rules for public companies, within the framework of its powers.

(ii) Settlements between the Bank and Citi

In the period covered by this report, the Supervisory Board monitored and supervised, on an ongoing basis, the area of settlements between the Bank and Citi, its strategic shareholder. In particular, such supervision covered any contracts for provision to the Bank of consulting and advisory services and operating support, and for performance of actual operations connected with banking activity in the area of information technology, including banking outsourcing. On 7 January 2015, the Supervisory Board approved the fee resulting from the contract for consulting and advisory services.

(iii) Amendments to the Articles of Association and the Regulations of the Bank

By the resolution of 14 August 2014, the Supervisory Board determined the consolidated text of the Rules of the General Meeting of Shareholders of Bank Handlowy w Warszawie S.A.
