Cash Advance Fees Late Fees

Program Performance Dashboards

Program Performance Dashboards are designed to monitor key program metrics related to credit usage and compliance trends including delinquency status, fees charged, and card account status.

The Program Performance Dashboards can be leveraged to enforce department policies and monitor card program profitability.

These dashboards provide graphical summaries of:

- **Past-due metrics:** Outstanding amounts and transactions in 30-day intervals
- **Status of card accounts:** For open, closed, and other account categories
- **Fees:** For cash advances and delinquencies

The "Link to Details" feature for Program Performance Dashboards allows users to access account level details for each summary report.
