

## Case Study

# Aegea

## Brazil – Expanding access to sewage and running water in low-income communities

LCY facility to expand sewage coverage and running water with specific sanitation solutions for underserved communities

### The Client

- Aegea is the largest private provider in the Water & Sanitation sector in Brazil and serves **30 million** people
- **30 years** of average concession contract tenor
- Aegea's concession operates in Manaus, the capital of the Amazonas state and part of the Brazilian Amazon region
- Aegea's performance was recognized in 2019 by the United Nations Global Compact as a Success Case in Water & Sanitation

### The Transaction

- Local Currency term loan
- Use of proceeds: expand the company's sewage coverage and refinancing

### The Impact

#### Access to basic infrastructure:

- **25% expansion** of coverage during the loan life
- Aegea provides **door-to-door service** program used to identify regions that did not have regular supply of treated water
- Social tariff program offers **50% discount** on water & sewage bills for approximately 20% of the local population
