

CitiConnect API – Clearing and Cross Border Payments for Banks

Real-Time Connectivity in the World of Digital Finance

CitiConnect API

Application Programming Interface (API) is the primary entry point into Citi whether it is called from a company's own application or vendor application. API enables nimble interactions in digital ecosystems.

CitiConnect® API allows Citi to expose a menu of TTS products and services through direct integration with Treasury Workstations (TWS), Enterprise Resource Planning (ERP) platforms, or other online applications.

CitiConnect® API Developer Portal helps Accelerate implementation and go live faster by easily accessing the latest information and performing technical testing upfront.

Online Repository - One place to access the latest documentation and information on APIs any time you need it.
Sandbox Environment - Test APIs even before accounts are available, resulting in higher quality releases and less rework.

Key Benefits

Provide flexibility
and choice to consume financial services as desired and needed

Accelerate client implementations
by simplifying integration and reducing onboarding time

Next-generation client experience
by providing an API onboarding portal and facilitating access to banking services

What is OAUTH 2.0 and Why it is Important in API Setup?

- It supplies the authorization workflow for web, desktop applications, and mobile devices.
- OAuth 2.0, which stands for “Open Authorization”, is a standard designed to allow a website or application to access resources hosted by other web apps on behalf of a user. It replaced OAuth 1.0 in 2012 and is now the de facto industry standard for online authorization. OAuth 2.0 provides consented access and restricts actions of what the client app can perform on resources on behalf of the user, without ever sharing the user's credentials.
- OAuth 2.0 is an authorization protocol and NOT an authentication protocol. As such, it is designed primarily as a means of granting access to a set of resources, for example, remote APIs or user's data.
- OAuth 2.0 uses Access Tokens. An Access Token is a piece of data that represents the authorization to access resources on behalf of the end-user.
- OAuth 2.0 doesn't define a specific format for Access Tokens. However, in some contexts, the JSON Web Token (JWT) format is often used. This enables token issuers to include data in the token itself. Also, for security reasons, Access Tokens may have an expiration date.

OAuth Actors

Certificates for Consideration

- Trusted Authorities: Citi API does not support self-signed certificates; your organization should procure and own the certificates. Citi API uses the trusted certificate authorities as below, Contact your Implementation Manager to support any other trusted CA which is not listed here.
- Verisign
- Symantec
- Equifax
- Comodo
- Thawte
- Entrust
- Go Daddy
- Geo Trust
- DigiCert
- Global Sign

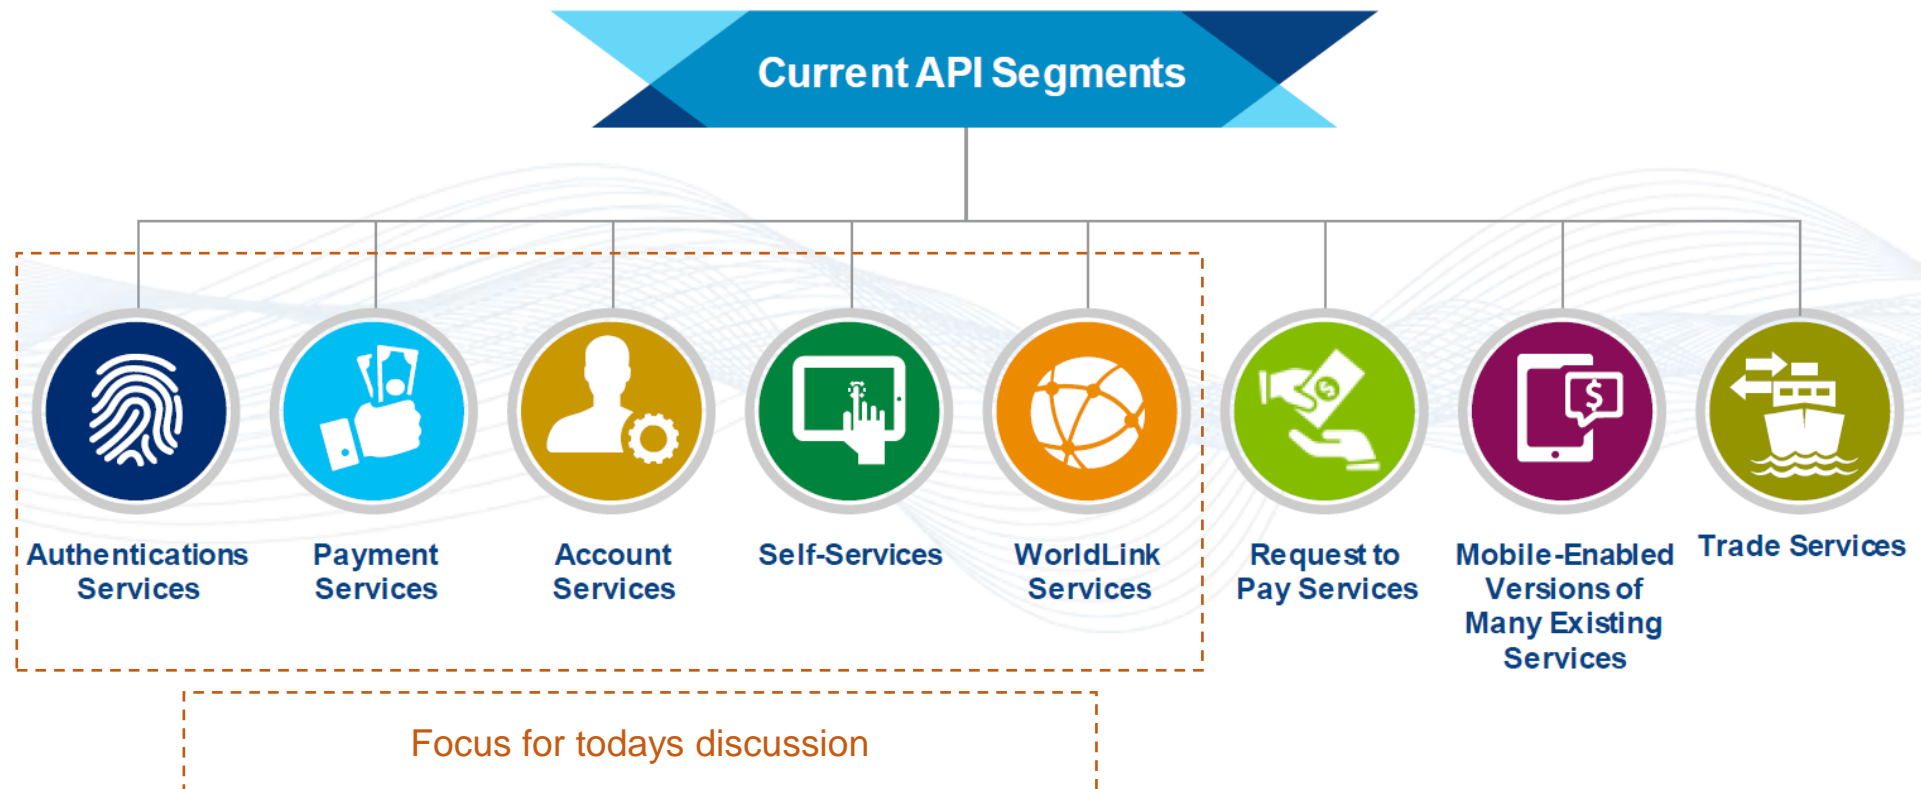

Extended Validation Certificates provides more trust and security than the Domain Validated and Organization Validated Certificates

Certificate Type	X509
Signature Hash Algorithm	SHA256(Minimum)
Key Length	2048-RSA
Certificate File Formats	Base64-encoded X.509 (.cer or .pem)

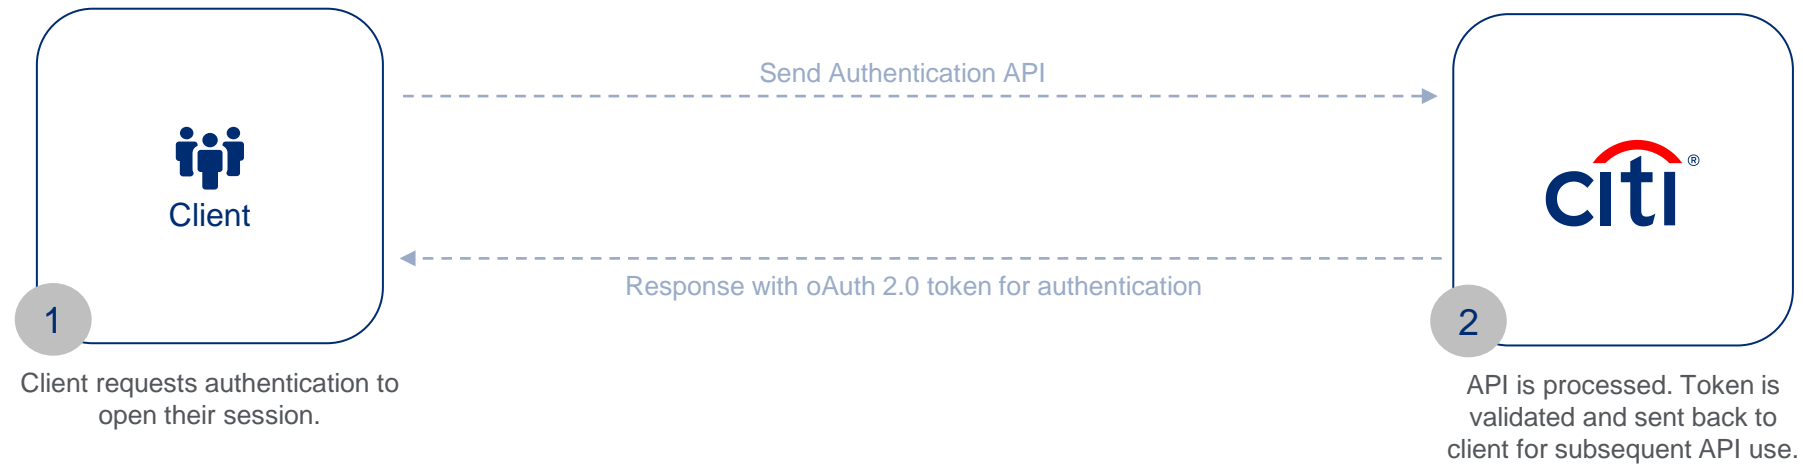

Innovation: Access to TTS Services Anytime from Anywhere

API technology (Application Programming Interface) allows Citi to expose a menu of TTS products and services to our clients anytime, anywhere through customized integration with Treasury Workstations (TWS), Enterprise Resource Planning (ERP) platforms, or other online applications.

Since launching CitiConnect® APIs, we have processed more than 1bn API calls for over 250 clients across a range of functions including: payment initiation, payment status, and/or account balance inquiries. CitiConnect® APIs also encompass real-time information on FX rates, account stater

Authentication API provides security for all clients and confirms all users' credentials before allowing access to Citi platforms.

Authentication and Security

Authentication

Authorization

Digital Signing
and Encryption

What to Know?

- ✓ Utilizes OAuth 2.0 token process
- ✓ OAuth token is valid for *one hour* after retrieval
- ✓ Security Certificates required
- ✓ Authentication API available 24*7
 - *APIs available 24*7 still have a possible platform downtime
- ✓ Timeout is contingent on setup
- ✓ Format: XML

Current Available APIs – For FI Clients – Global Clearing

Payment Services

Payment Status Inquiry

Payment Status—Push Notifications

Enhanced Payment Status Inquiry

Enhanced Payment Status—Push Notifications

Account Services

Balance Inquiry

Statement Initiation

Credit/Debit—Subscription

Credit/Debit—Push Notifications

Self-Services

Payment Cut off Time Inquiry

Branch Holiday Inquiry

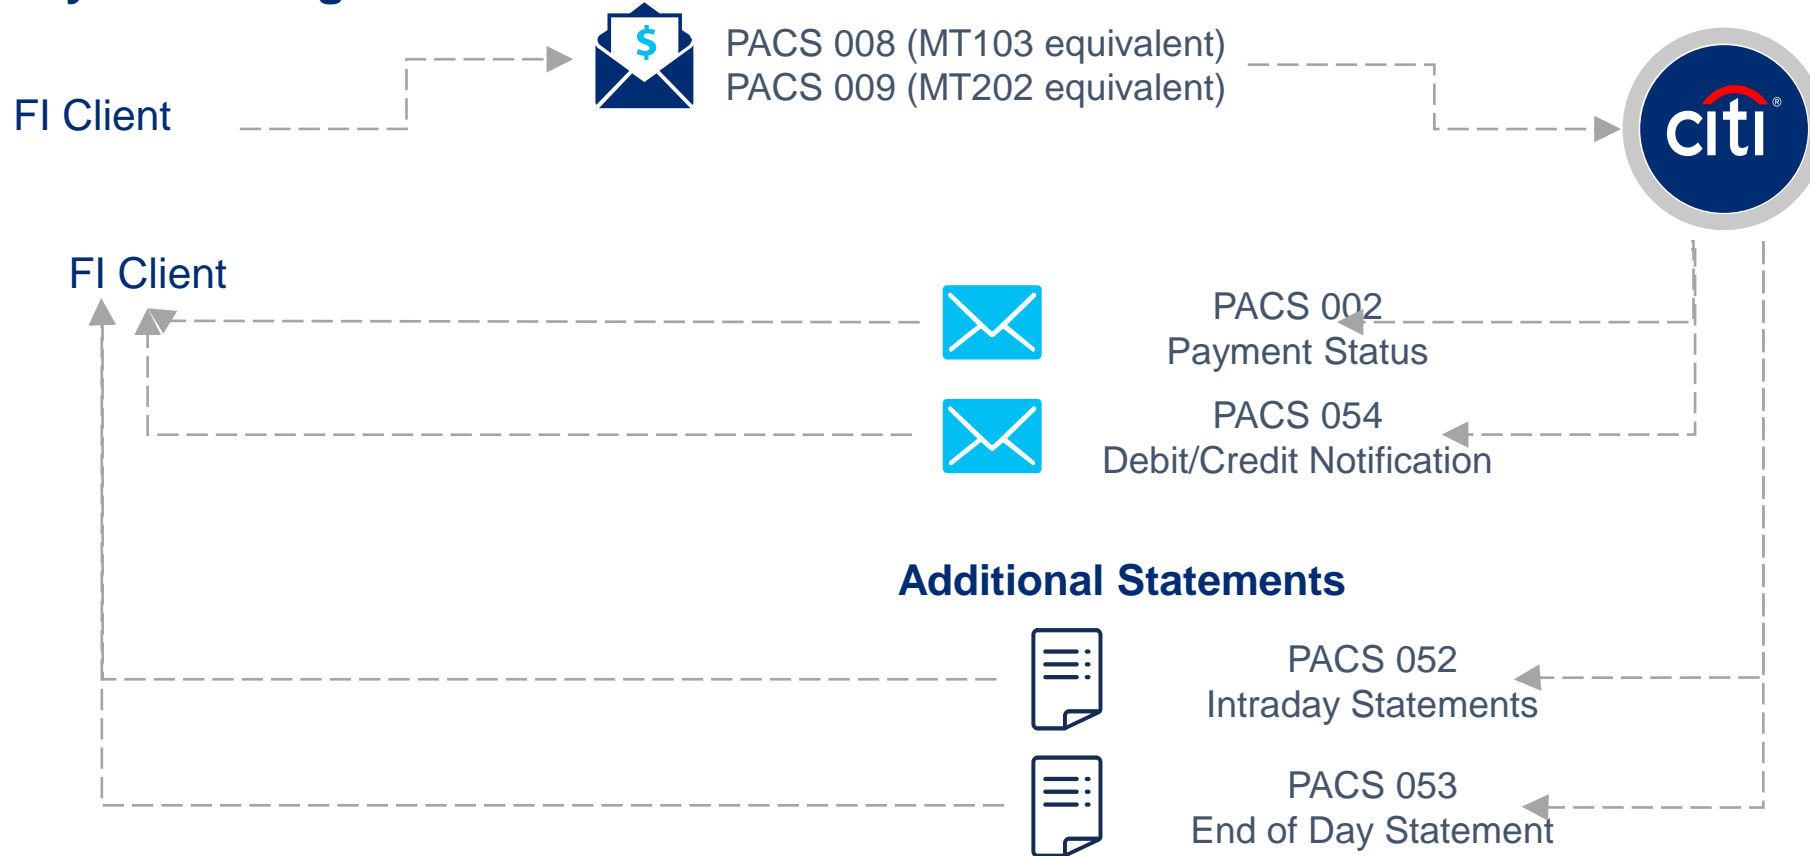

Proof of Payment

Transaction Report

Client to Citi API Flow – Clearing USD/GBP/EUR

FI Payments Origination

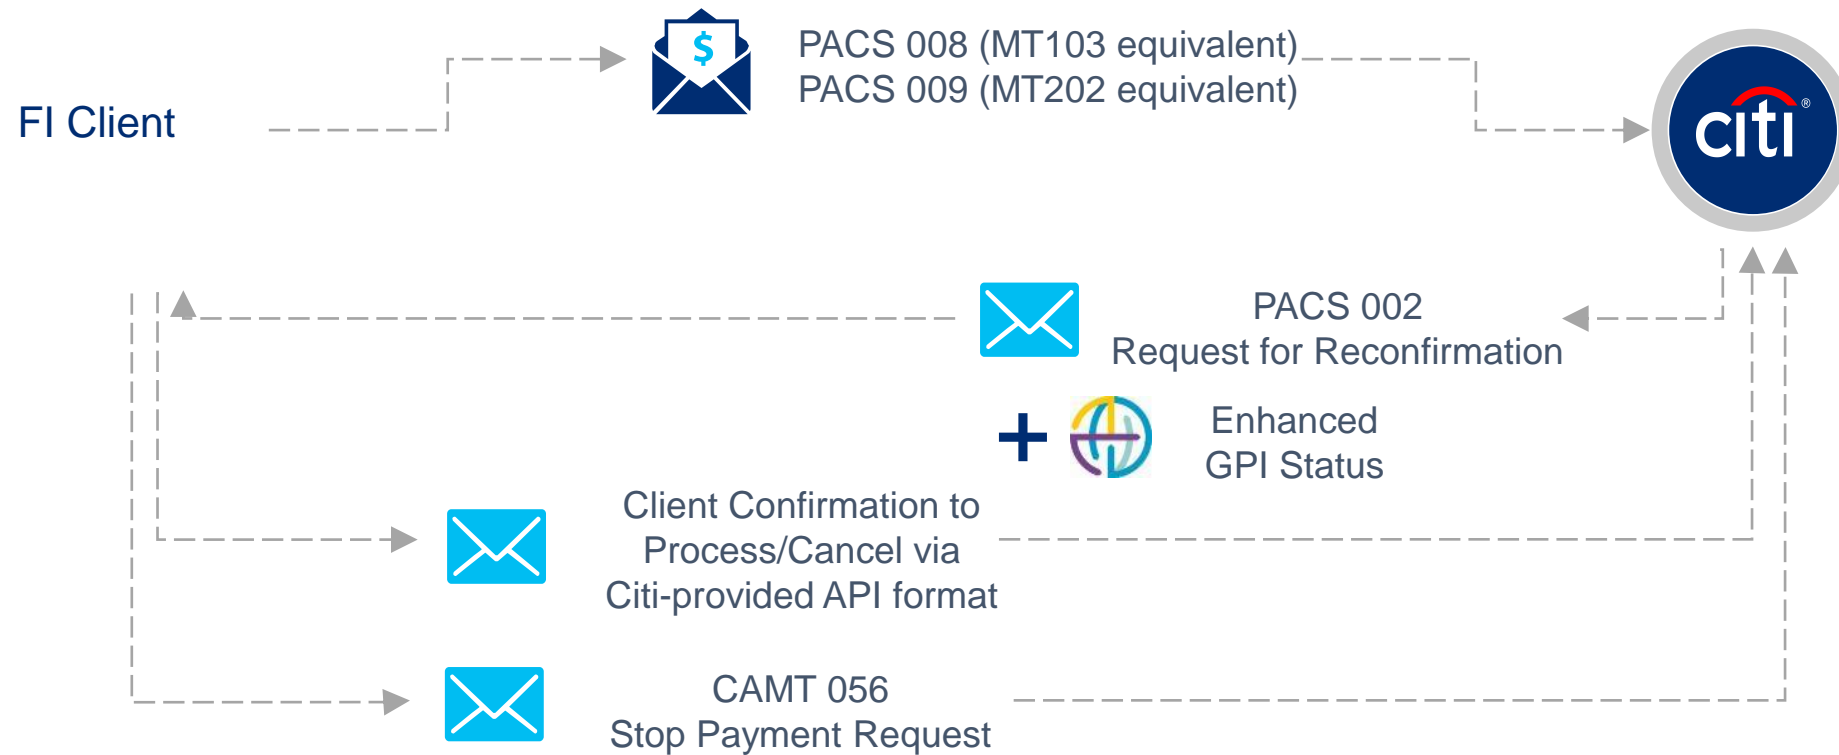

Benefits

- API will allow richer information exchange
- Data availability on Real time basis
- Using Standard Format

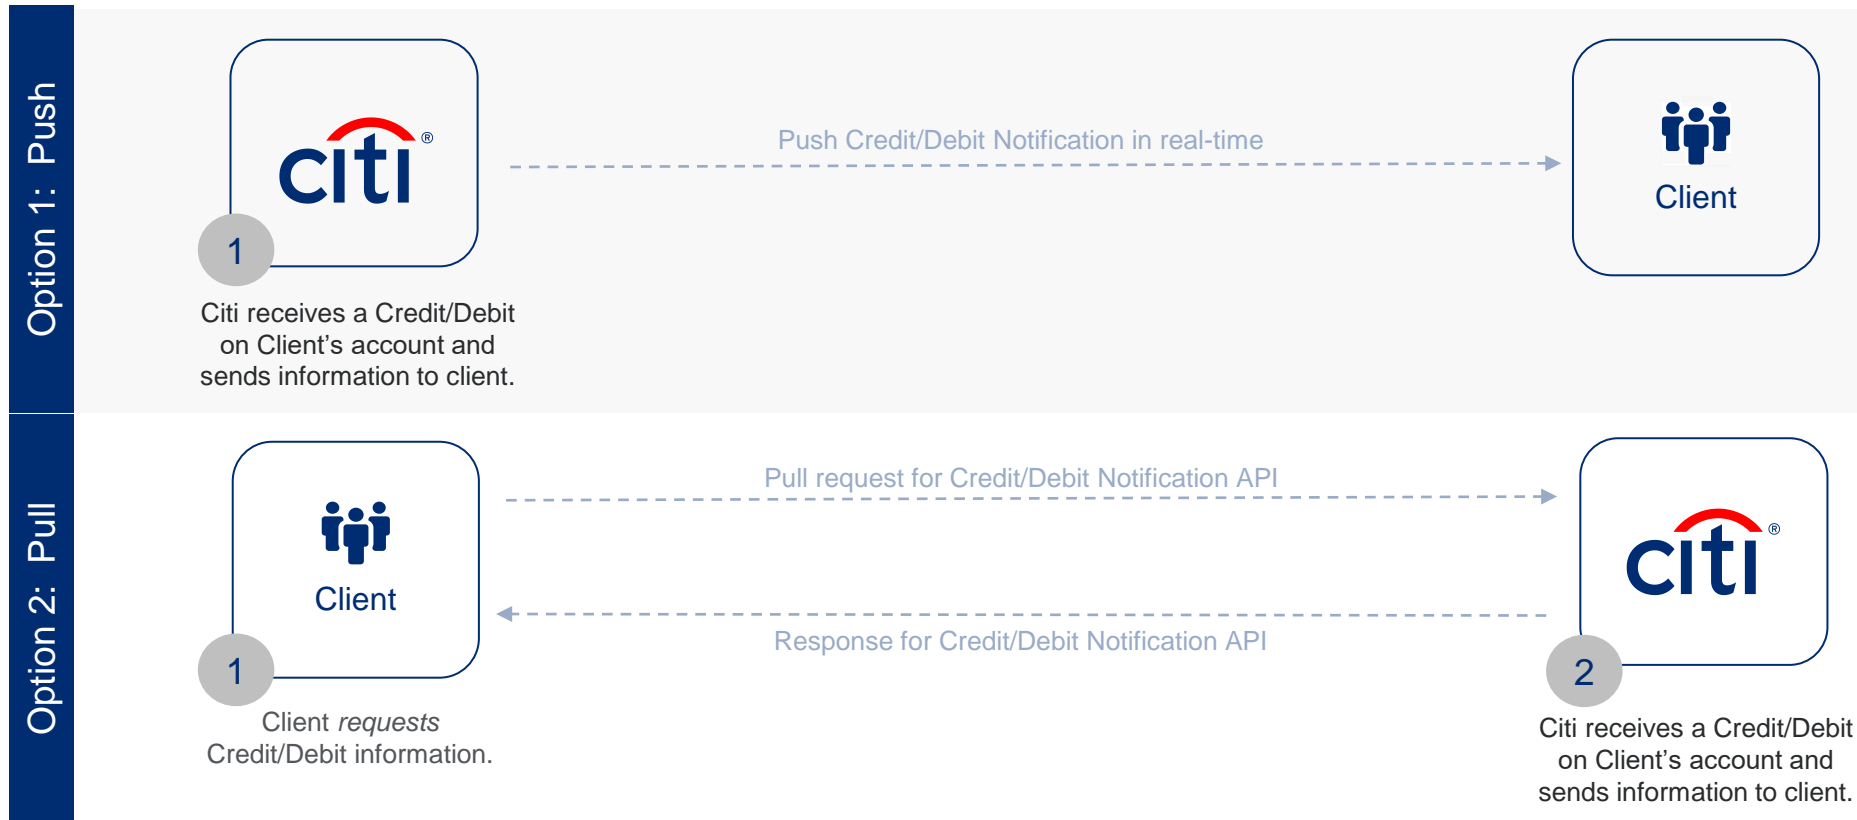

Client to Citi API Flow - WIP

This year we are rolling out richer capabilities: Reconfirmations, Stop payments and End-to-end payment status

FI Payments Origination

Credit/Debit Notifications API informs Client of a credit or debit entry in an account.

Credit/Debit Notifications – Use Cases

Clients want real-time insights on credits/debits from their account

User can confirm charges are legitimate

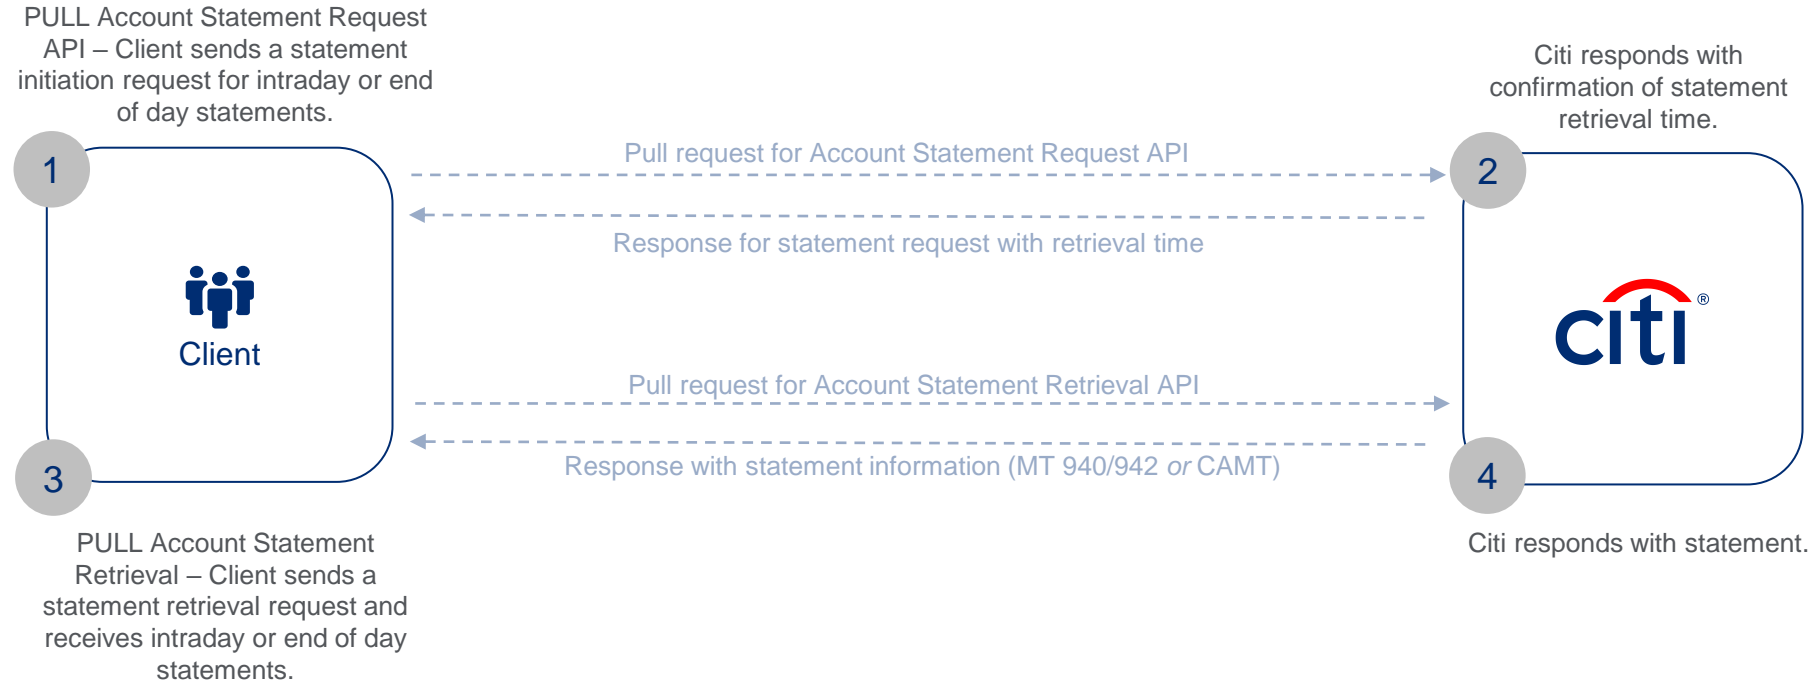

Client won't release goods to Buyer until they are notified of credited account

What to Know?

- ✓ Allows for real-time reconciliation
- ✓ Format: XML

CitiConnect API | Account Statement Inquiry/Request

Account Statement Inquiry and Request APIs obtain the account statement based on a Reference ID provided by Statement Inquiry API for a certain period.

Account Statement Request – Use Cases

Treasury must reconcile account statements with internal records

Clients need account statements to project future P&L

Clients have on-demand access to historical statements

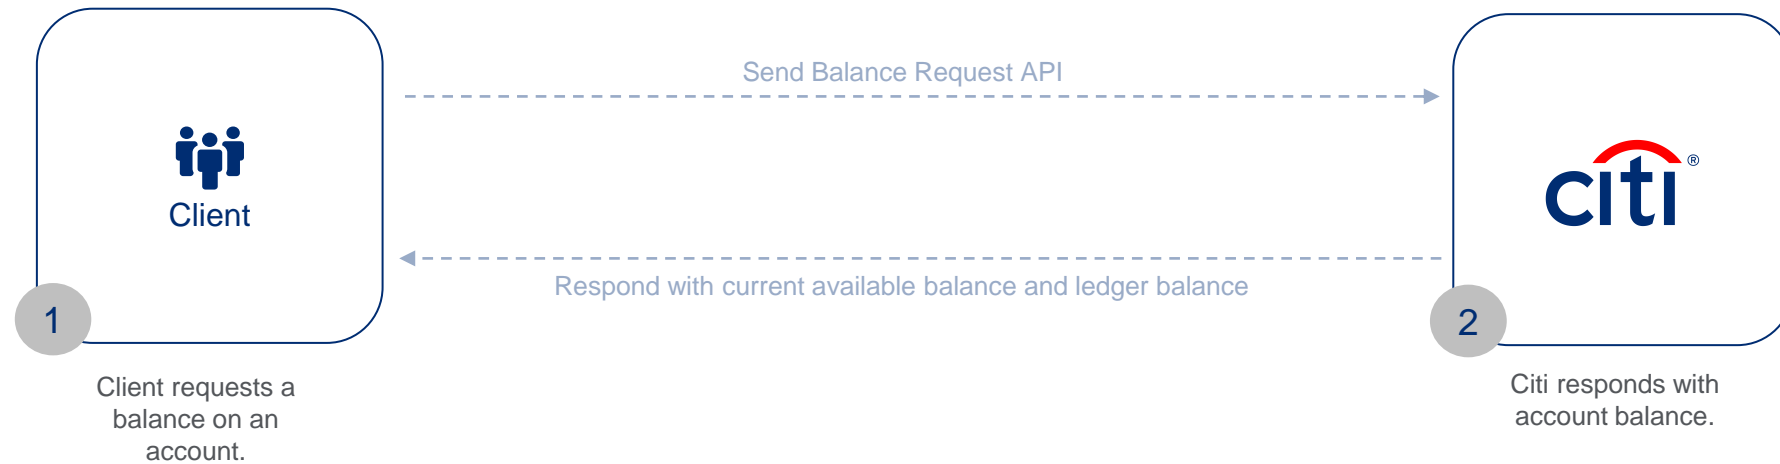

What to Know?

- ✓ Statement Retrieval requests may only be made for one Reference ID
- ✓ Available end of day and intraday
- ✓ Retention is 150 days of data
- ✓ Flexible data extraction – no set schedules
- ✓ Format: XML, SWIFT MT

CitiConnect API | Balance Request

Balance Request API allows Citi's clients to access ledger and available balance across all their accounts with Citi.

Balance Request – Use Cases

Treasury team
needs real-time
visibility

Client must check funds
prior to instructing large
payment

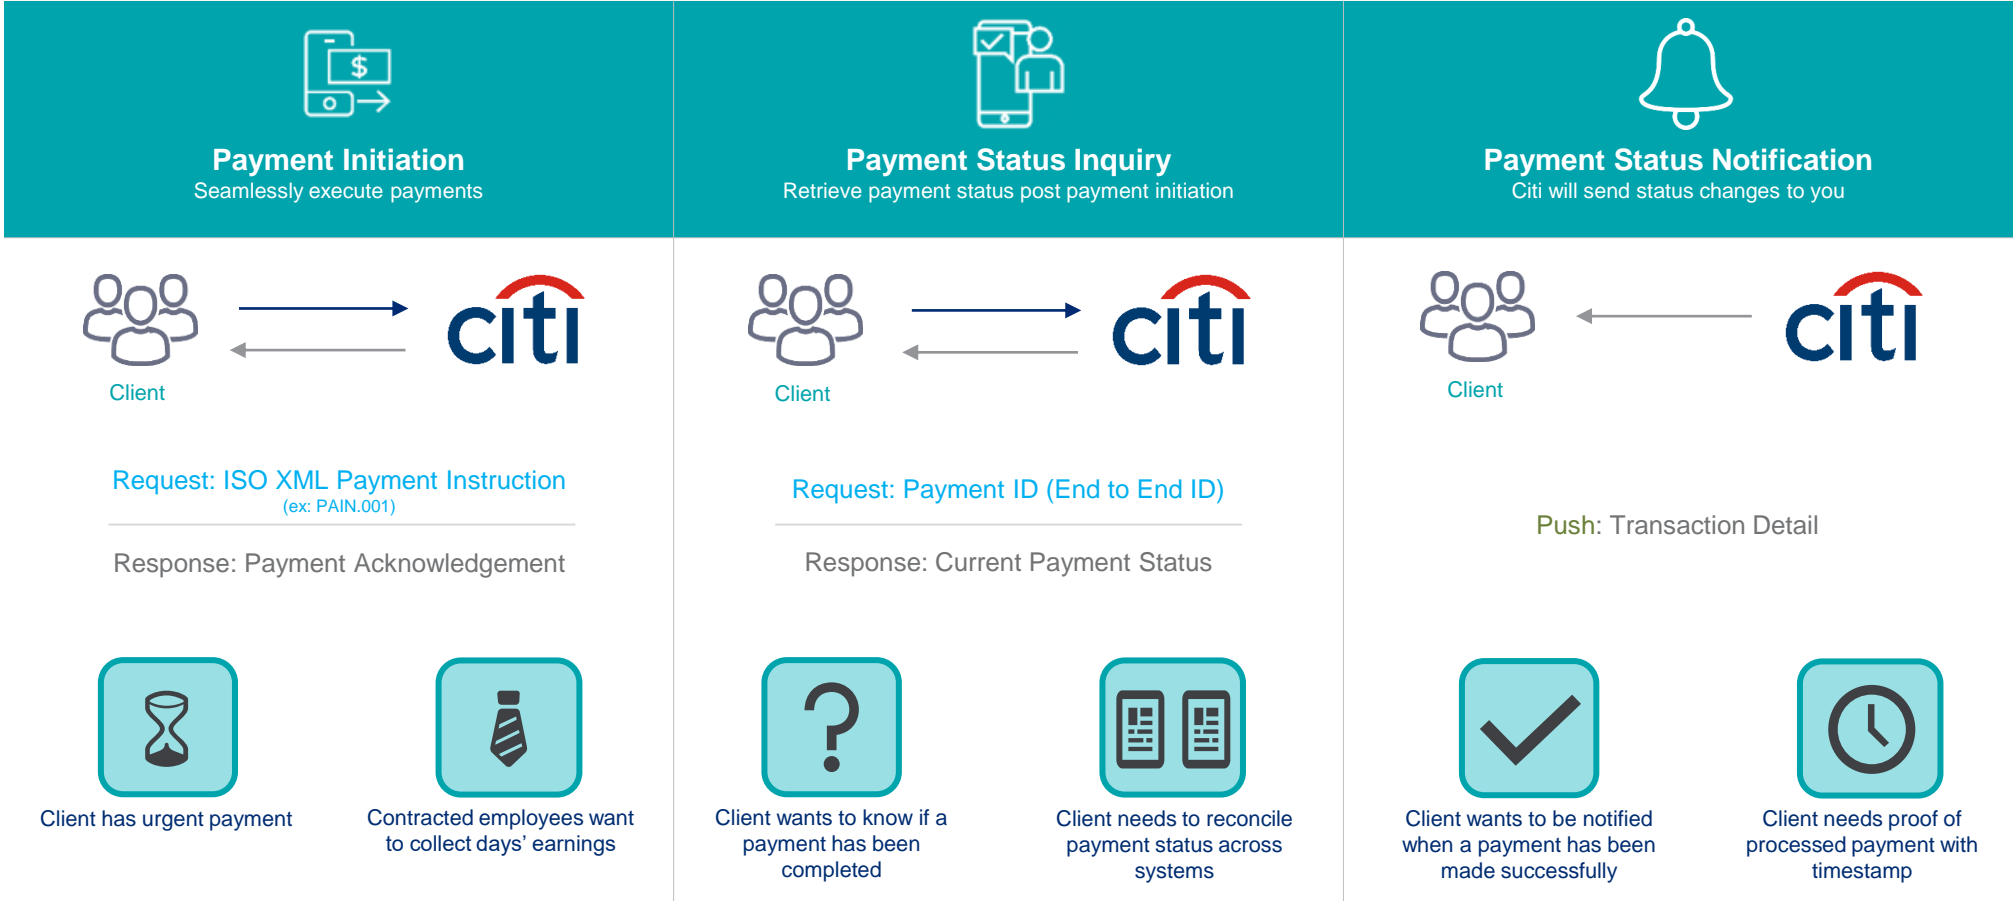

Client needs account
balances for multiple
accounts at once

What to Know?

- ✓ Can request balances for multiple accounts in single API call or by branch
- ✓ Must provide an Account Number or Branch ID to solicit a response
- ✓ Format: XML, JSON
- ✓ Response is a customized camt.052 with balances only (ie. no transactions)

Popular Payment Services APIs

Payment Services APIs account for **60%** of our CitiConnect® API client base

WorldLink API Endpoint

WorldLink® is a complete cross-border payment and Foreign-Exchange (FX) service that allows you to perform payments in 135 currencies without having the need to maintain local currency accounts for each of them. CitiConnect® API now offers you WorldLink® services of FX rate enquiry, FX deal booking, cross-border payment initiation with 24X7 availability.

FX Rate Inquiry

Receive the FX rate and Deal ID for a given currency pair

Request: FX Rate Request for Currency Pair

Response: FX Rate and Deal ID

Client needs to know deal ID for currency of the beneficiary

Client wants to create multiple international transactions at once

WorldLink Payment Rules

Receive exact requirements for initiating a WorldLink payment

Request: Payment Rules Request

Response: Payment Rules Detail

Client has urgent payment but doesn't know exact payment rules

Client needs to understand payment requirements for a certain country

WorldLink Payment Validation

Confirm payment before initiating transaction

Request: JSON, ISO XML Payment Instruction
(ex: PAIN.001)

Response: Payment Acknowledgement

Payments need validation before being processed

Clients can use this API for testing in the production environment

Once authenticated, you may perform the following WorldLink® related tasks:

- Inquire about the prevailing FX rates, FX spot tenors or pre-spot where available in the market.
- Validate a Cross border payment against the payment country rules
- Initiate a cross border payment
- Inquire about any previously initiated transaction
- Subscribe for auto-notification on payment status updates.

Appendix / Use Cases

Payment and Inquiry Functions

Account Services offer an array of functionality related to statements and balances.

The functions include:

Balance Inquiry

Statement Initiation

Statement Retrieval

Credit/Debit—Subscription

Credit/Debit—Push Notifications

Payment Service functions are among the most commonly used by our clients. They include all payment-related functionality, such as Instant Payments, allowing clients to initiate and reconcile various forms of disbursement.

The functions include:

Payment Initiation

Payment Status Inquiry

Payment Status—Push Notifications

Enhanced Payment Status Inquiry

Payment Status—Push Notifications

WorldLink and Request to Pay Functions

Here, various WorldLink Services are exposed.

The functions currently include:

WorldLink FX Rate Inquiry

WorldLink Payment Initiation

WorldLink Payment Status Inquiry

WorldLink Payment Status—Push Notifications

Request to Pay Services offer clients the ability to collect payments from their customers, along with various notification / updating capabilities.

The functions include:

UPI RTP—Collection Initiation

UPI RTP—Transaction Inquiry

UPI RTP—Push Notifications

RTP—Collection Request

RTP—Collection Response

RTP—Collection Inquiry

Digital / Automatic and Mobile-Optimized Functions

Mobile-Enabled Services are a light-weight version of a many of our existing API's, which are optimized to be integrated into a client's mobile app / ecosystem.

The functions include a mixture of the below:

Authentications Services

Payment Services

Account Services

Self-Services

Request to Pay Services

Digital / Automatic Services empower clients to determine various rules, system availability, and other search / reporting functionality via API calls.

The functions include:

Payment Cutoff Time Inquiry

Branch Holiday Inquiry

Proof of Payment

Transaction Report

Payments Beneficiary Search

Core Access and Security Functions

Authentication Services are leveraged by every client to gain access to our API portfolio. These are a required core set of functions to validate client identity, ensuring they can obtain access to services they are provisioned for.

The functions include:

Authentication

Logout

Clients can now initiate a request for the issuance of Trade Guarantees directly from partner applications, such as Enterprise Resources Planning systems and Treasury Workstations. Clients can also request the status of any initiated Trade requests.

The functions include:

Trade Initiation—enter details of the Guarantee/SBLC

Trade Inquiry—access the status of your Trade

IRS Circular 230 Disclosure: Citigroup Inc. and its affiliates do not provide tax or legal advice. Any discussion of tax matters in these materials (i) is not intended or written to be used, and cannot be used or relied upon, by you for the purpose of avoiding any tax penalties and (ii) may have been written in connection with the "promotion or marketing" of any transaction contemplated hereby ("Transaction"). Accordingly, you should seek advice based on your particular circumstances from an independent tax advisor.

This communication is provided for informational purposes only and may not represent the views or opinions of Citigroup Inc. or its affiliates (collectively, "Citi"), employees or officers. The information contained herein does not constitute and shall not be construed to constitute legal, tax and/or accounting advice by Citi. Citi makes no representation as to the accuracy, completeness or timeliness of such information. This communication and any documents provided pursuant hereto should not be used or relied upon by any person/entity (i) for the purpose of making regulatory decisions or (ii) to provide regulatory advice to another person/entity based on matter(s) discussed herein. Recipients of this communication should obtain guidance and/or advice, based on their own particular circumstances, from their own legal, tax or accounting advisor.

Any terms set forth herein are intended for discussion purposes only and are subject to the final terms as set forth in separate definitive written agreements. This presentation is not a commitment or firm offer and does not obligate us to enter into such a commitment, nor are we acting as a fiduciary to you. By accepting this presentation, subject to applicable law or regulation, you agree to keep confidential the information contained herein and the existence of and proposed terms for any Transaction.

We are required to obtain, verify and record certain information that identifies each entity that enters into a formal business relationship with us. We will ask for your complete name, street address, and taxpayer ID number. We may also request corporate formation documents, or other forms of identification, to verify information provided.

Certain services and/or products mentioned in this communication may contain provisions that refer to a reference or benchmark rate which may change, cease to be published or be in customary market usage, become unavailable, have its use restricted and/or be calculated in a different way. As a result, those reference or benchmark rates that are the subject of such changes may cease to be appropriate for the services and/or products mentioned in this communication. We encourage you to keep up to date with the latest industry developments in relation to benchmark transitioning and to consider its impact on your business. You should consider, and continue to keep under review, the potential impact of benchmark transitioning on any existing services and/or product you have with Citi, or any new services (you avail) and/or product you enter into with Citi. Citi does not provide advice, or recommendations on the suitability of your service and/or product choice including with respect to any benchmark transitioning on any existing service and/or product you have with Citi. You should obtain professional independent advice (tax, accounting, regulatory, legal, financial or otherwise) in respect of the suitability of your service and/or products in light of benchmark transitioning as you consider necessary.
